

TYLÖ DESIGN LINE

Design Line is a series of products consisting of four brand new sauna designs. Each one is an absolute concept of style, ready to be used. You can choose a size – or perhaps you like them as they are.

Sensation

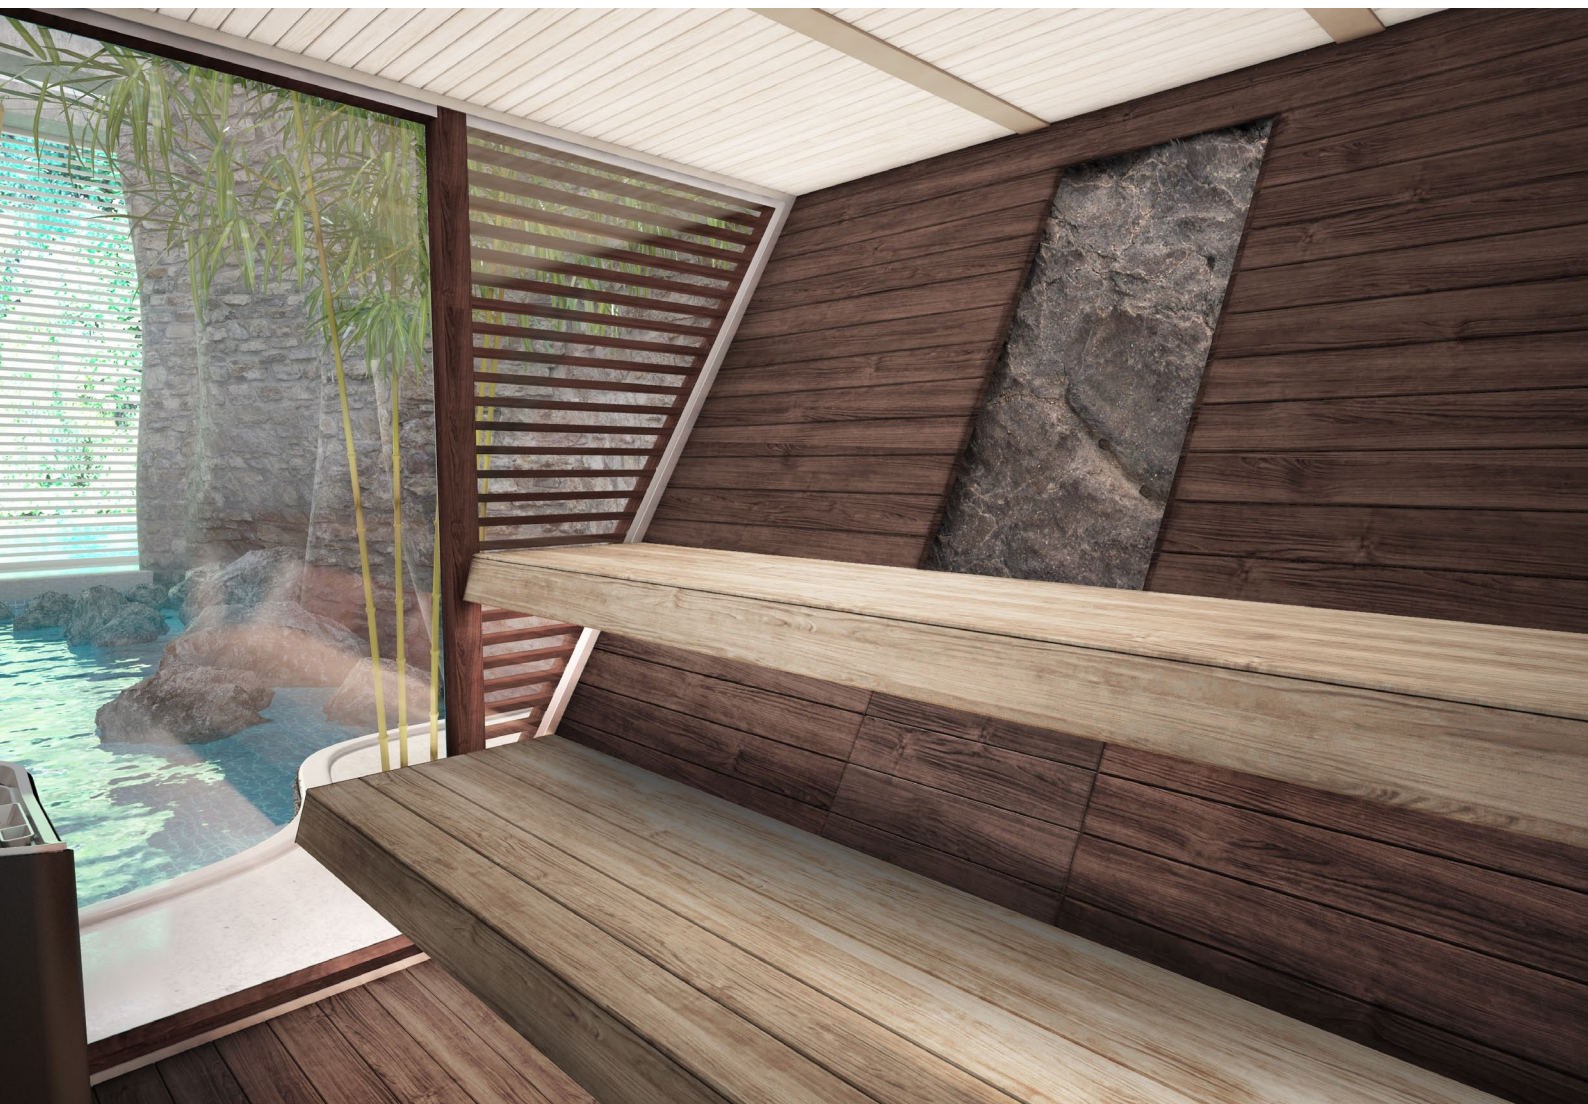

There is good reason why the waterfall is centrally positioned. The dark wood and beautiful design with diagonal ribs are magnificent, but all eyes are on the steaming, cascading water feature. Even without this option, you can expect a superb sauna experience.

The sloping rear wall saves energy and creates a gentle thermal breeze inside the room. The emphasis on natural materials inside the sauna is highlighted by the heat-treated espresso aspen on the rear wall, interior lining and other features. The benches are made of slightly lighter tiger ash and the exterior cladding has a high-gloss finish.
