PRODUCT CATALOGUE 2011

HELO Genuine Sauna & Steam

Sauna has been around for more than 2000 years. Historically, it has been an ongoing cornerstone of Finnish culture, an essential of everyday life. Within sauna walls, we find a few precious moments to reflect on the day, share a laugh with loved ones, or just unwind and enjoy the glow earned from physical effort. Today's Helo saunas, steam rooms and accessories are an original, honest expression of our Finnish roots. We know what a relaxing, rewarding, reviving few minutes of soft heat can do for the body and soul. You will see it in the quality of our craftsmanship, the breadth of our service and in our obsessive attention to detail—a true passion for making the genuine sauna experience available to all.

Sauna Cabins

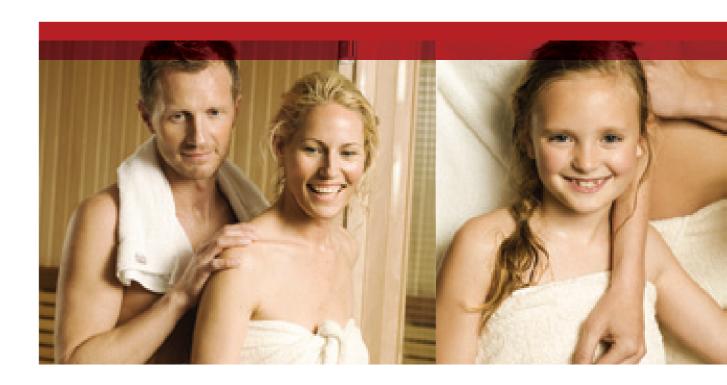

HELO every day

We believe everyone should be able to enjoy the physical, emotional and spiritual benefits of sauna and steam every single day. That is why you will find so many choices in this catalogue. Styling options to suit almost any home and taste in decor. Functional features that help you recreate the daily sauna or steam experience you and your family appreciate best. And a host of extras that let you customise the comfort to your exact specifications. With Helo, there are no barriers to making a genuine sauna or steam experience a natural part of every day home life. That is our commitment: Helo for all, every day.

Health and relaxation

The healing benefits of sauna and steam have been known by cultures around the world for at least a thousand years. After a workout, it soothes aching bodies. After any activity, it renews passion for life. Regular use of sauna, steam or Infrared can help detoxify your body, melt away muscle and joint aches and pains, and relieve stress. It is one of the very best investments you can make in you and your family's health and well-being. The physical benefits combined with the associated stress reduction makes the decision to purchase a Helo experience an easy one—it not only feels good, it's good for you.

Quality and environment

The genuine Helo experience begins long before the first wave of soothing heat touches skin. When you choose Helo, you are ensuring only the very highest level of commitment to quality and safety will become part of your home. Our materials and production comply with all international safety regulations and recommendations. We work on the principle that quality is important to even the smallest detail—and that quality must be realised responsibly. This is your assurance that only the best materials and production processes are used in creating your personal sauna or steam experience.

The importance of wood, water and nature in the genuine sauna experience shapes our commitment to environmental responsibility. Our production design and improvement team continually develops solutions to reduce energy consumption. Environmental factors play a crucial role in our choice of raw materials. And we are always finding new ways to reduce the amount of waste and maximise the useability of raw materials in the manufacture of our products.

Tradition and innovation

The sauna is rich with tradition. And like all good traditions, it is as relevant today as it has always been.

In the old days, the sauna was a simple detached cabin standing at the edge of the yard. Over the years, we have continued to adapt the sauna in keeping with the times—today, the Helo experience is equally at home in a high-rise apartment or a detached house.

Today's sauna tradition is being shaped by Helo's complete, modern line that includes sauna and steam rooms ranging from the most straightforward to uncompromising luxury. At their heart, your choice from a wide selection of electric and wood-fired heaters, steam generators and infra-red generation technology. High tech control systems let you take easy advantage of all the options available to tailor your Helo experience. And accessorizing with everything from bench pillows to water pails gives your modern sauna a personal touch.

Still, Helo research and development is always working to develop new products and solutions. The future of sauna is as important to us as its past, and we draw on the feedback from our professional partners worldwide to lead the way in product and service innovations.

At Helo, the genuine sauna experience is being continually updated to meet the realities of modern living. But it will never lose its soul.

At Helo, design and performance go hand in hand to provide your ultimate sauna experience. Many of our products, including cabins and heaters, are the result of close collaboration with some of the world's most renown designers. Working with top designers and experts ensures new products both look and perform to our—and your—most exacting standards.

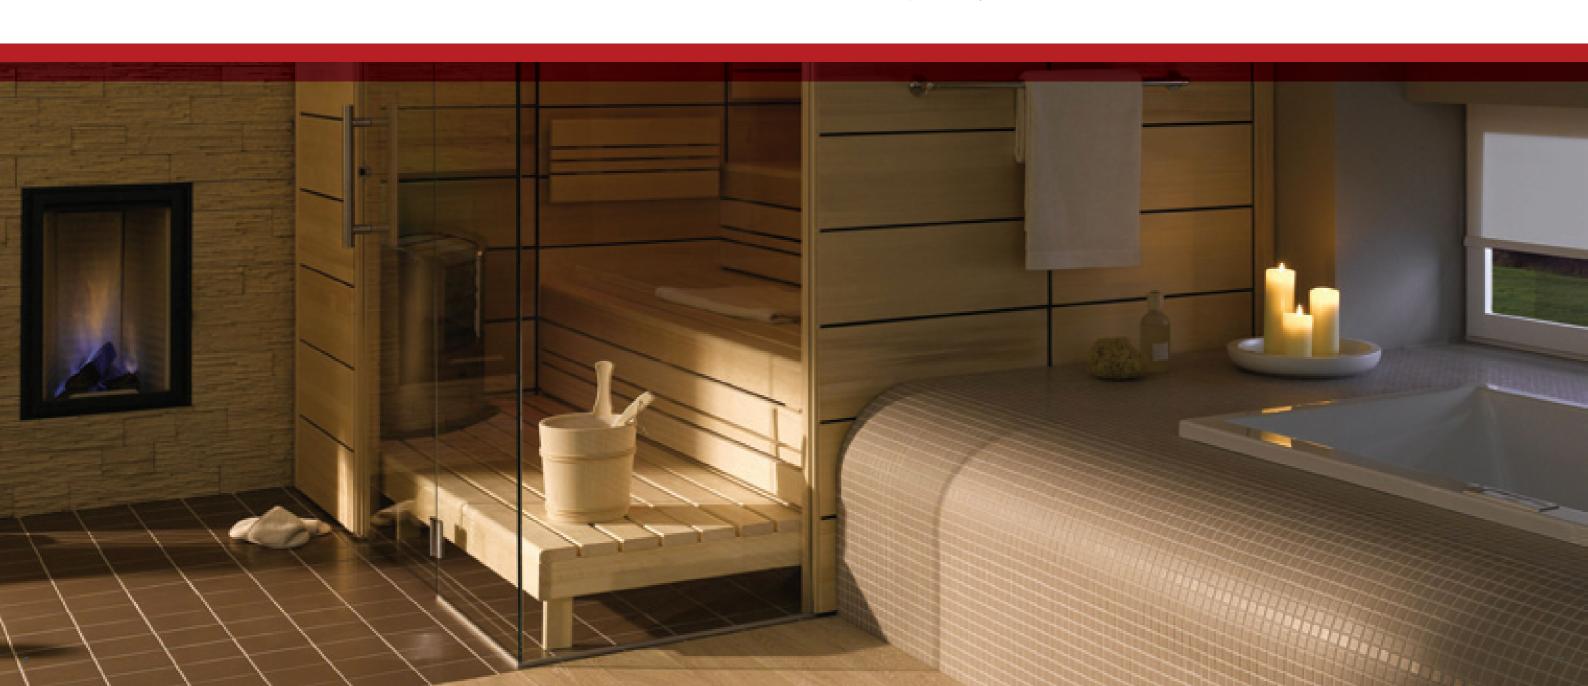

The seamless incorporation of craft and stylisation offers you a modern, flawless sauna experience adapted to your individual tastes and needs.

SAUNA CABINS

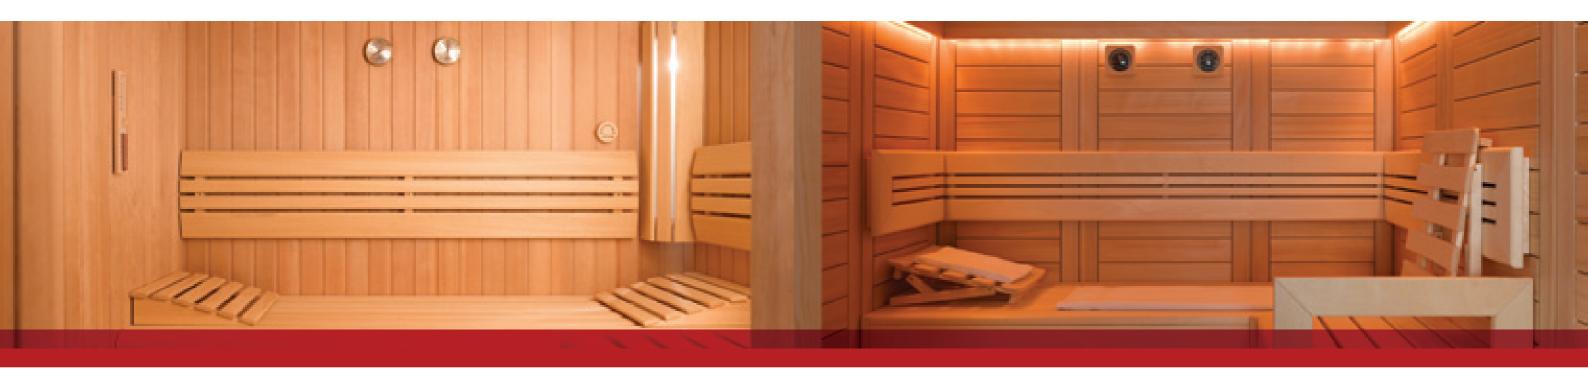

The genuine Helo experience comes in many sizes, shapes and styles—each a singular expression of quality, expertise and design. So which one is right for you? You want a sauna cabin to become a seamless part of your every day home life—which means considering structure and performance specifications as well as aesthetics. In the next few pages, you will be introduced to many of our cabin layouts and options. Whatever your choice, each offers the comfort, dependability and well-being only a genuine sauna from Helo can provide.

In some cases, Helo sauna cabins can be modified to accommodate any special needs or requests you might have. If you have any questions, please do not hesitate to contact the Helo representative in your area.

Sauna Cabins MASSIVE LOG OR ELEMENT CONSTRUCTION

There are two basic sauna constructions you can choose from. Each provides different structural advantages, which can be useful to know before choosing a cabin style.

■ Element Sauna

Element saunas are solidly constructed with wood panelling that "locks" together thanks to tongues and grooves on the inside and outside of individual panels.

ADVANTAGES OF THE ELEMENT SAUNA

- You have many options for the type of wood used for panelling, both inside and out
- Prefabricated wall elements are easy to assemble and install. The entire sauna can be quickly disassembled and reassembled when you move as well
- Deep 70-80 mm wall thickness and high quality insulation keep heat in longer, minimising leaks and requiring less energy
- No nails are visible to detract from the visual appeal or safety of your element sauna cabin

Natural cork insulation and a steam barrier between the inside and outside panels ensure excellent temperature stability.

■ Massive Log Sauna

In a massive sauna, the walls are made of solid, interconnected wood planks. The precision of the locking system means no other material is needed for insulation—the wood is all that's needed to maintain stable temperatures.

ADVANTAGES OF THE MASSIVE LOG SAUNA

- The natural insulation qualities of the wood create a softer and gentler heat than is normally found in element saunas
- High quality material in wall and ceiling creates a very cosy, inviting look and feel
- All elements are prefabricated, making assembly and installation easy
- Wood planks are specially treated and designed to prevent warping from heat or moisture
- → Wall thickness between 44 58 mm means less bulk and material, but still excellent heat trapping properties

No other material is needed for insulation due to the precision of the locking system.

CUBE

The CUBE sauna cabin brings a mix of modern material to traditional sauna comfort. Glass and stainless steel offer a modern design aesthetic to the exterior. Inside, soft wood panelling creates a sense of light and well-being. CUBE is particularly suited for modern living or bathroom decors, where its sophisticated yet inviting presence complements its surroundings. Eye-catching yet soothing, CUBE is an invitation to relax and rejuvenate in style.

A study in contrasts

CUBE's instant attraction comes from its contrasting interplay of materials and colour. The dark Wengé veneer wood exterior is softened yet put in relief by the light Aspen interior that beckons through the partly glazed glass front. As an option, a sliding panel with a mirror and varnished, light-green tone can be added to the windowed wall.

Fine material, perfect surfaces, clean workmanship
—the CUBE is convincing in every detail.

- Quality Wengé veneer exterior combines with Aspen interior to classic yet modern effect
- + Fittings in stainless steel add a subtle yet distinct high quality touch
- ESG partially glazed glass front panels offer high style on the outside, a feeling of space on the inside
- Optional LED light dimmer allows you to set the mood
- Available in three sizes to let you best take advantage of the space available: 187x203, 204x203 and 212x203 cm

Optional sliding panel with mirror is both useful and attractive

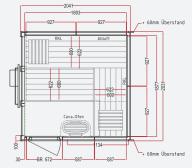

STANDARD SAUNA HEATER

The Cava sauna heater works well with CUBE thanks to its complementing contrast in material: elegant rounded stainless steel with soap stone slats. Below the soap stones, 30 kg of hidden sauna rocks provide evenly distributed heat.

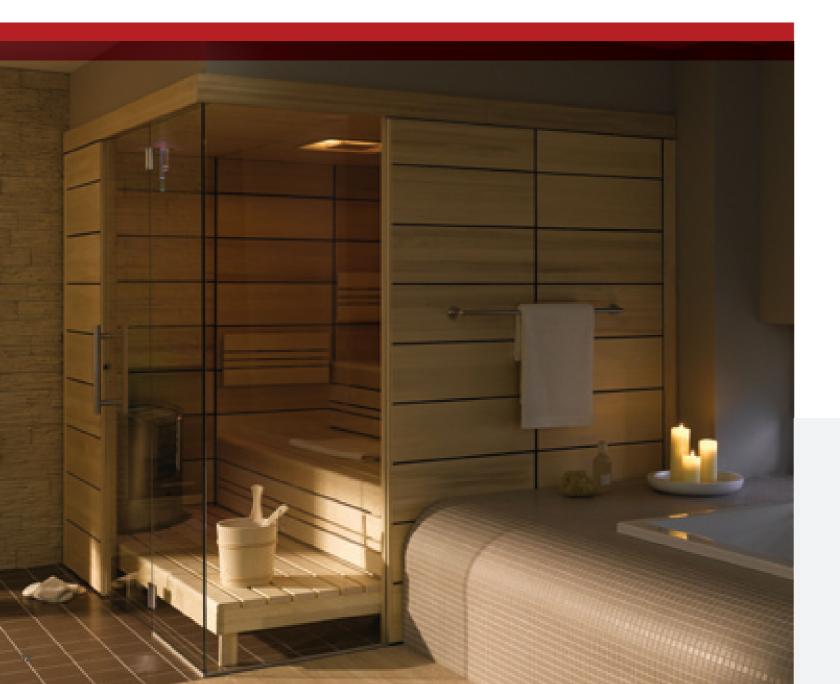

CUBE comes in three convenient sizes, making this unique and eye-catching sauna work with the dimensions available to you. In any size, there's comfort and closeness for two with a refreshing corner of clear space to enhance the overall feeling of roominess.

COMFORT

Everything about COMFORT sauna cabins says welcome. Its golden interior is a constant invitation, promising genuine warmth and cosiness through the dual-wall glass panelling. There's a real sense of roominess too; unimpeded sight lines, three-level interior, wide, easily-moveable benches... All complemented by a stylish yet deceptively powerful sauna heater that sets the ideal conditions for relaxation within minutes.

Simply stylish

With its subtle aesthetic touches, COMFORT has a look all its own. Notice the elegance of the large glass panels without a corner post. Or the sleekly convenient extra-large door handle and soft splash of light from the integrated ceiling fixture. COMFORT is as much about what you don't notice as what you do.

- 19 mm fir massive wood panels on all 4 interior walls and the 2 visible exterior walls create a sense of elegance that spreads to the whole room
- Clean ESG glass fronts with no corner post and door provide a seamless design feel
- Triple level interior for maximum comfort, the lowest level in premium near-knotless Aspen
- Solid water-resistant aluminium base frame to protect your investment

- Moveable ergonomic backrests and bench aprons let you customise the look and feel of your COMFORT
 - Available in your choice of three standard layouts

STANDARD SAUNA HEATER

The CAVA sauna heater distributes 9KW of heating power to 30 kg of hidden sauna rocks. Soap stones provide an elegant cover for the stones, combining with the modern stainless steel heater shell to give substance an added lift of style.

COMFORT offers three layout

options, making it easier to

find one that works best for

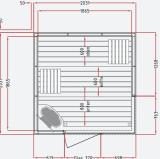

you and your home. Each is

easy and convenient to install,

letting you enjoy the genuine

sauna experience as quickly

as possible.

CUPREME

CUPREME is a spaciously-stylish option that brings the positive benefits of sauna to a whole new level. Designed to provide individual pockets of temperature preference, CUPREME's aspen interior is perfect for enjoying the gentlest sauna climate possible with no bracing temperature changes. Clean and classic on the outside yet deceptively roomy inside, CUPREME makes sharing a soft, soothing sauna with family and friends impossible to resist.

Perfect climate

CUPREME's combination of heating from a high quantity of heating stones and allnatural configuration create optimal conditions for relaxation. Heat is reflected from wood and stones only. This makes the temperature build-up gradual, so you can relax even when strong infusion is applied.

Massive log sauna creates a sense of traditional quality and is easy to assemble

- A completely space-customisable solution, sized in 11cm increments for maximum flexibility
- 58 mm fir interior walls and ceiling reflect heat without added insulation and minimised use of materials
- Two outer walls in natural wood and two finished in high quality Wengé veneer
- Designed to last with warp-free planks, offering you many years of trouble-free enjoyment
- Large glass wall and door create a sense of space and feeling of high design

Experience our interactive ROCHER presentation online.

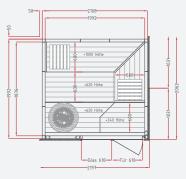

STANDARD SAUNA HEATER

The powerful Rocher sauna heater is the ideal match for CUPREME. It can be installed anywhere in the sauna, providing even heat from its 100kg of Finnish stones to every corner of the cabin.

With CUPREME, you choose the sizing and proportions of your personal sauna in 11cm increments. We custom-produce your sauna according to your exact specifications. We can also help you measure your space onsite and make appropriate recommendations.

SUPREME

SUPREME truly lives up to its name. Available in a wide range of configurations and sizing options, SUPREME makes it easy to plan a personal oasis for the senses. A massive log sauna, SUPREME's near-knotless fir walls and aspen interior regulate an ideal sauna climate with no added insulation. At the same time, these materials combine with glass doors and windows for an aesthetic impression that is pleasing in every sense.

Harmony your way

SUPREME is a centre for well-being that gives you more freedom to make best use of the space you have. It can be tailored with outer shelves or bathrobe hanging space if you prefer. And its combination of soft-coloured fir and glass creates a modern look that will fit in well with almost any room.

Bench and back rest in aspen with matching bench cushion is an invitation to relax and unwind anytime.

The SUPREME system gives you excellent flexibility in determining the size of your sauna. Configurations are available from 129 to 269 cm, with increments in 11 cm steps. Width and depth dimensions can also be combined, giving you a free hand to plan a stylish, high-performance sauna wherever it suits you best.

- Massive log sauna is easy to assemble and is guaranteed warp-resistant, providing many years of trouble-free sauna experiences
- Light aspen interior is soothingly elegant, comfortable an easy to clean Customize the interior with a wide range of accessories such as back rests and bench aprons
- Special outer cabin options such as glass shelving and robe-hanging space help keep your sauna area stocked, organised, and always ready for visit
- Size according to your needs in 11 cm increments

58 mm near-knotless fir for the walls and ceiling is solidly beautiful, and softens the interior climate for stable, soothing heat

STANDARD SAUNA HEATER

DESIGN is an aesthetically pleasing heater in stainless steel and enamel that works as good as it looks. You can also choose to fit your SUPREME sauna with many of our additional heater options—see them all on page 42.

One of the many SUPREME layout options available to you in 11 cm increments. If you prefer, our techni-

cians can reproduce layout

drawings for you—for more

information, contact your

local Helo dealer.

FINESSE

FINESSE is a high concept series of sauna cabins emphasising quality design and precision craftwork. The spruce used in our FINESSE configurations is toughened by its Nordic origins—making it ideal for withstanding high temperatures. Natural good looks and quality design, available in three unique interpretations, lets you recreate the genuine sauna experience in a modern and highly appealing way.

Good things come in threes

FINESSE is available to you in three intelligent and highly aesthetic configurations. Princess adds elegance with its seven corner rounding. Royal includes a multi-layer interior and thoughtful outer cabin features such as shelving and robe-hanging space. Relax has depth and comfort to spare with its inverted cone layout.

- Massive log saunas in 58 mm natural wood planks are easy to assemble, beautiful to look at and able to withstand the internal tensions created by heat and humidity
- Quality Nordic spruce construction combined with glass doors and specialty windows create a traditional yet unique look
- **+** Extra roomy benches in either 50 or 60 cm, depending on the chosen configuration
- Lots of headroom with an external height of 202 cm
- + Plenty of options with sizing choices from 129 to 269 cm in increments of 11 cm

Interconnected log structure.
Wood naturally reacts to temperature and humidity changes.
The tension and movement creates massive forces that might normally cause wood to break.
Our unique interconnected log structure neutralises these forces.

Each design includes head rests, duck board, heater guard rail, back rests, bench aprons, light units and wiring cable—everything you need

STANDARD SAUNA HEATER

DESIGN' stainless steel and enamel finish make it a pleasure to look at. And its soft, even heat distribution thanks to 35 kg of rocks in direct contact with heating elements make it a pleasure to experience.

Part of the beauty that is FINESSE is that it can be sized in 11 cm increments and laid out in so many distinct ways.

AMBIENTE

Most massive log saunas are made of solid planks laid horizontally. AMBIENTE turns that idea on its head by positioning the solid planks vertically. The difference is more sizing and placement options and a unique look from a sauna that provides the softest and gentlest climate available. Letting you enjoy the very best sauna experience any way you like.

No-nonsense by design

AMBIENTE has a straightforward look that reflects the true roots of sauna tradition. Still, its pleasing vertical lines and custom fitting possibilities make a distinct impression. Add the glass and stainless steel fixtures, and AMBIENTE offers a fresh take on the genuine sauna experience.

- AMBIENTE is unique in a massive log construction in its ability to be sized to special measures in 10 cm increments—create the high-performing sauna you want in the space you have
- Solid 44 mm thick plank construction
- There's really no limit in terms of size—the soft-climate sauna is now available wherever you have space for it
- As a massive log sauna, AMBIENTE is easy to assemble and has a distinct quality look and feel

Roof inclines and corner entries can be easily integrated, offering even more customisation op-

STANDARD SAUNA HEATER

Ambiente comes with a choice of APOLLO or LUMI heaters. APOLLO is attractively compact and holds up to 23kg of genuine Finnish sauna stones. Elegantly tapered in chrome steel, LUMI holds 20-23 kg of stones. Both options deliver a soft and easy to control sauna climate.

AMBIENTE is custom-made in 10 cm increments for your one-of-a-kind design with true soft-climate sauna

experience. Bring your ideas

to your local Helo dealer in

your region—and see how

easy and cost-effectively

they can become reality.

AMBIENTE SUPREME

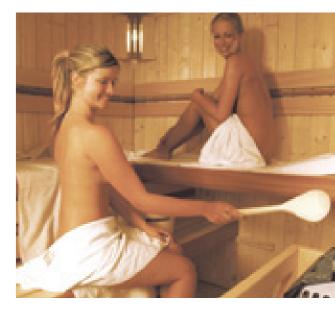

AMBIENTE SUPREME gives you the ultimate combination of flexibility, comfort and styling options. Choose from 50 combinations between 150 cm and 245 cm, 5 distinct and attractive interiors and many more personalisation touches to create your own beautiful and highly individual personal rejuvenation centre.

Looking good, feeling great

AMBIENTE SUPREME features outer walls in attractive, top quality fir massive log construction. Inside, enjoy the soothing comfort and beauty of the aspen finishing on inner walls and interior details. Complete your perfect home health centre with any door from our wide range of options.

- AMBIENTE SUPREME is a massive log construction in 44mm or 58mm selected fir planks, easily assembled vertically, with 1 horizontal division log in the middle of the wall—an inspiring and highly original effect.
- Attractive and solid aluminium corner posts and shell frame
- 50 possible size combinations from 150cm to 245cm let you create an appealing genuine sauna experience wherever you have the space
- Massive log planks are designed with a special "Link" system that prevents damages due to tensions created by heat and moisture—no tightening of walls necessary
- Interior design in high quality aspen—including all comfort touches from benches and backrest to duckboard and heater guardrail
- Adjustable sauna height, choice of sauna door and glass elements, and custom-cut door and window openings allow you to create the sauna you want, your way

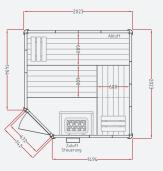

STANDARD SAUNA HEATER

AMBIENTE SUPREME maximises your customisation options for the comfort climate as well. Choose from a wide range of technologically advanced and stylish heaters, each with its own unique look and function opportunities, on page 42.

AMBIENTE SUPREME comes in 50 unique size and layout combinations from 150cm to 245cm. Your local Helo dealer will be happy to help you find the right one for the space you have—and provide other helpful interior and exterior ideas or heater recommendations as well.

CASA

CASA is a top quality massive log sauna that combines handsome, well-crafted features with the luxurious relaxation of soft-climate sauna. CASA construction reflects the very best virtues of the massive log concept—interlocking Nordic spruce planks that require no tightening yet are tough enough to remain stable and undistorted. A floor to ceiling door and options such as corner entry and frameless glass only add to the elegant simplicity of the design.

All natural quality

CASA puts the design focus back on all-natural. Solid spruce planks, beautifully comfortable abachi interior, naturally-pressed cork roof insulation... even the door handle is crafted in solid wood. Quality you can clearly see makes CASA a natural for seamless integration into your modern bathroom design.

- Massive log construction with 44 mm Nordic spruce planks—beautiful to look at, easy to work with
- Light abachi wood interior, stays remarkably comfortable even for sensitive skin regardless of temperature
- Available in 16 different sizes to accommodate even the most difficult spaces
- Attractive wall-high all-glass door
- Extra comfort from 50 / 60 cm wide sauna benches

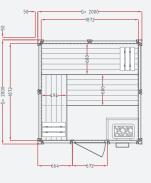

Backrests, headrests, duck board, heater guard rail with two sides, bench aprons, sauna light unit, silicone cable all automatically included with your CASA sauna

STANDARD SAUNA HEATER

CUP's compact power ensures it fits right in with CASA. Its aerodynamic top and duo aluminium/zinc shell optimise heat generation and distribution. Requiring only 15kg of stones, CUP is small enough to be accessible yet out of the way in the CASA layout and still produce an even, soft climate.

CASA comes in 16 popular layout options. Shown here: Compact square, a staggered dual-level configuration for up to four people. Ask your local Helo dealer or turn to the Technical Specifictions pages for more options.

SPRING

SPRING offers an ideal combination of sensibility and modern design. Sleek, light and multi-textured, SPRING materials complement almost any modern decor. Inside, relaxation and well-being are assured thanks to a mild sauna climate, perfectly controlled thanks to quality heating and insulation behind the genuine Nordic spruce panels. Easy to assemble and easy to appreciate—what better reasons to bring SPRING into your home.

14 steps to a healthier you

Enjoying SPRING might happen faster than you think. The cabin consists of 14 prefabricated lockable pieces and wiring. A little assembly effort, maybe with some help from the family, and the reviving qualities of a genuine sauna experience will be yours to enjoy. Time and time again.

- Element sauna in attractive and durable 12.5 mm
 Nordic spruce panelling—quick set-up
- Optional "Spring Relax" interior finished in comfortable abachi and luxurious mahagony
- SPRING is also available in a mirrored version, creating a feeling of more space
- Includes three max comfort sauna benches (50/60 cm wide), two optional back rests with the "Relax" version, two headrests, duck board, and three-sided heater guard rail for maximum safety and comfort
- Three different layouts to choose from

Beige metal plate and tinted glass combine for a modern, eye-catching look

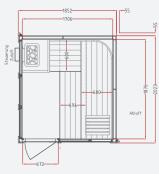

Recessed lighting provides a soothing, relaxing atmosphere

STANDARD SAUNA HEATER

CUP's compact power ensures it fits right in with CASA. Its aerodynamic top and duo aluminium/zinc shell optimise heat generation and distribution. Requiring only 15kg of stones, CUP is small enough to be accessible yet out of the way in the CASA layout and still produce an even, soft climate.

Compact yet intelligently laid out, SPRING saunas in any of their three layout options could be ideal for a fitness room. Ask your local Helo dealer or turn to the Technical Specifictions pages for more options.

VARIO CONCEPT

VARIO CONCEPT is our most flexible sauna system. It offers more than 360 different sauna sizing options, and is purpose-designed to be adaptable to special areas and room shapes. But never at the expense of quality—all VARIO CONCEPT components are created using the very best materials, including solid wood. Some models can even be manufactured with sloping base frames or roofs and custom integrated glass. With VARIO CONCEPT, the sauna you want makes ideal use of the space you have.

Always accommodating

Modern architects often take a creative approach, leading to unusual room layouts. VARIO CONCEPT is the system that complements their work, turning a "difficult" area into a useable centre for relaxation. With VARIO CONCEPT, a Helo dealer comes to your home to help with the measurements and advise you on your options. Together, you can create a dream sauna that looks just as good as it feels.

- + Cladding with 16 mm "soft line" panels on all walls, not just on visible ones
- ♣ Efficient insulation with mineral wool and aluminium foil as vapour barrier
- Round-edged sauna benches in African abachi for maximum comfort; lower benches movable for easy cleaning
- + Efficient ventilation system with duct vent, adjustable air flow
- Every board is blind fastened, no nails or screws are visible
- + Custom-size your VARIO CONCEPT in increments as small as 8.5 cm

Supplied with complete internal trim in abachi softwood, as well as benches, headrests, backrests, duckboard, bench aprons, heater guard rail and light unit

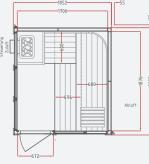

STANDARD SAUNA HEATER

The Helo DESIGN heater is perfectly at home in your VARIO CONCEPT sauna. 35 kg of rocks in direct contact with heating elements ensure plenty of soft, even heat. Its stainless steel shell and enamel finish will fit right in as well.

Customised VARIO CONCEPT saunas are easy to integrate in any area of the home. Thanks to sizing increments as precise as 8.5 cm, your personal wellness centre can make a style and relaxation statement out of almost any unused

space, giving you many more interior planning options.

MULTI NORM

MULTI NORM offers you an incredibly flexible set of sizing options in an attractive, pre-configured design palette based on genuine Nordic spruce. An element sauna construction system, MULTI NORM lets you take advantage of almost any available space with an easy-to-assemble and quickly accessible family relaxation centre.

Ready, set, relax

MULTI NORM makes taking advantage of almost any space quick and simple with a solidly constructed, yet easily assembled and installed sauna in 144 size combinations from 160cm to 243cm. And with a choice from 3 abachi wood-based interiors and a variety of glass windows, you can still customise your comfort to your exact needs.

- 144 size combinations from 160cm to 243 cm for maximum flexibility
- Quality Nordic spruce element sauna panels—durable, attractive and easy to assemble and install
- No visible nailing for maximum safety and an attractive finish
- Insulated ceiling and walls with mineral wool and aluminium foil as vapour barrier, keeps climate soothingly stable
- Efficient ventilation system with duct vent, adjustable air flow

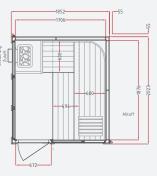

- Supplied with complete internal trim in abachi softwood, as well as benches, headrests, backrests, duckboard, bench aprons, heater guard rail and light unit
- 8 mm security glass door adds to the overall visual appeal while preserving the interior climate effectively
- Interior designed for a hidden heating system behind benches, keeping clutter to a minimum and making excellent use of available space

STANDARD SAUNA HEATER

CUP's compact power ensures it fits right in with CASA. Its aerodynamic top and duo aluminium/zinc shell optimise heat generation and distribution. Requiring only 15kg of stones, CUP is small enough to be accessible yet out of the way in the CASA layout and still produce an even, soft climate.

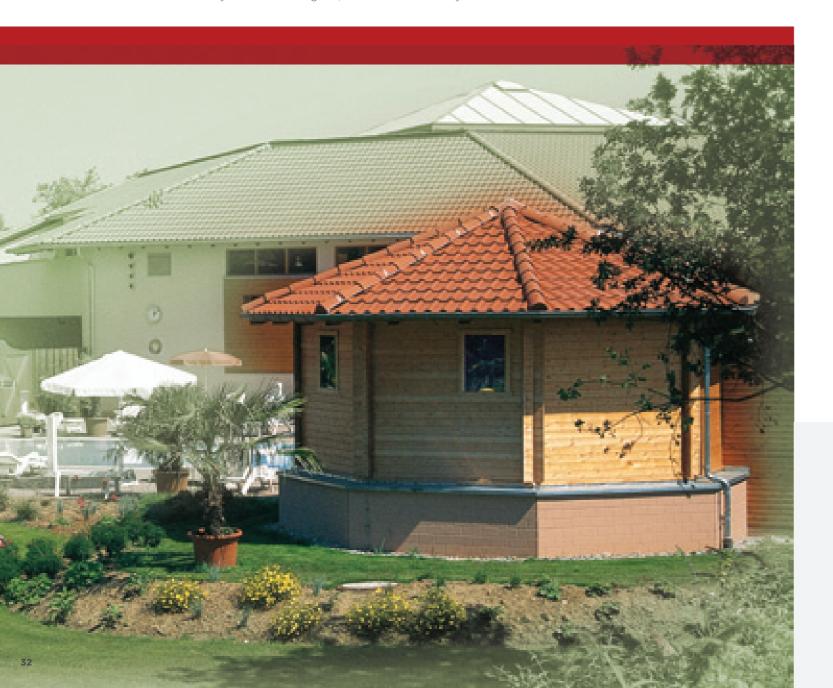

MULTI NORM saunas come in 144 set sizing choices from 160cm to 243cm. Once you have your measurements, ordering, assembling and installing your high quality relaxation centre is as simple and fast. If you'd like help with measuring or need to discuss any options, please contact your nearest Helo dealer.

OUTDOOR SAUNA

Not so long ago, all saunas were enjoyed outdoors—close to the house, and perhaps close to a lake. Today you can experience all the joys of that tradition with an outdoor genuine Helo sauna tailored to your exact needs. Helo outdoor cabins do not come in any preconceived format. Instead, you choose the wood, sizes and fittings you prefer: we take care of the rest. Take comfort in our years of experience and expertise in the design and building of genuine outdoor saunas—it will result in a family wellness centre that not only looks and feels good, but can add value to your home.

Quality time

Imagine having your very own outdoor retreat, where the whole family can take a rejuvenating break together. If you have a pool, everyone will enjoy the healthful benefits of deep-body heat followed by a quick, refreshing dip—and doing it all over again. A genuine Helo outdoor sauna, tailored to your exact specifications, makes family time quality time.

- Getting started is as simple as calling us with your idea—we'll build your dream outdoor sauna according to your specifications
- You can choose from a wide variety of layouts, woods, fittings, stylings and sizes. The only limit is your imagination
- Enjoy even more of the traditional outdoor sauna feeling with a modern, highly-efficient wood burning stove
- You can also give traditional relaxation a modern touch by taking advantage of colour light therapy—see page 53.
- Remember, local building codes may require special permission to build a sauna in your yard. Check with your local authorities
- Fully insulated, including the floors—keeping the genuine soft sauna climate in regardless of what's happening outside.

A genuine outdoor sauna from Helo is purpose-designed just for you. So why not add your own special touches—such as an integrated carport, as shown here.

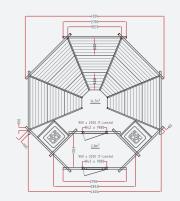

STANDARD SAUNA HEATER

HELO wood burning heaters add a real sense of genuineness to the outdoor sauna experience. Available in sizes providing 12 – 28 kw of efficient heating power, each is solidly engineered in a quality steel casing with an extra large rock pocket. The burning system keeps maintenance to a minimum by preventing soot from building up in the heater.

Outdoor genuine Helo saunas are custom made to your specifications. Our advisors have many years of experience in tailoring a back yard wellness centre for different landscapes and needs—call your Helo dealer anytime for advice or to schedule an onsite consultation.

SAUNA HEATERS

At the heart of every genuine Helo experience is its heat. Helo heaters are uncompromising in their design; aesthetically striking, yet powered by the world's most advanced sauna heater technology. Every model is purpose-designed for optimum performance, with more sauna rocks in direct contact with heating elements. The result is softer, gentler heat and comforting steam—you can really feel the difference.

Sauna Heaters

ROCHER

Our high capacity ROCHER sauna heater really makes a statement. Holding up to 100 kg of genuine Finnish sauna stones, ROCHER radiates soft, even heat from top to base. Despite its handsome open basket design, ROCHER can be installed in a corner, along a side wall or in the middle of the sauna. For an added design touch, you can also sink ROCHER into a lower bench and fit it with a glass or soapstone collar, either of which can be backlit to stunning effect.

100 kg of pure comfort

A ladle of water splashed on its 100kg of heating stones, and ROCHER responds with a purity and soft intensity that is impossible to resist. Its brushed steel brazier shell puts the stones in relief for an added dimension of pleasing genuineness.

- Greater exposed stone surface distributes heat evenly and provides soft, luxuriating steam in every direction
- With the longest heating elements of any heater on the market, more stones are in direct contact—ensuring purer, more stable heat radiance and maximum pleasure
- The high quality, modern design of the brazier steel bars easily holds the weight of the stones and can withstand extreme temperatures, ensuring years of trouble-free performance
- ROCHER's slim round form offers you many integration options—enjoy the purity of its design and function as a free standing heater, or sink it into a bench with backlighting for a dramatic effect
- Because of its high capacity, ROCHER is ideal in larger saunas—where it will provide soothing, yet gently-intensive heat to every corner of the cabin.

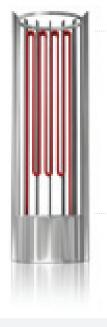

ROCHER features longer heating elements than any other heater available. They are fully integrated into the 100 kg of stones, essentially heating every single rock. This ensures heat and steam radiates evenly and quickly throughout the sauna.

FULL LENGTH HEATING ELEMENTS

CONTROL UNIT

ROCHER comes with the Digi 1 control unit that not only lets you adjust the heater, but gives you instant one-touch control of lighting, fans and timers. Its highly visible LED display makes all the information you need clear and easy to see.

Electric Sauna Heaters

CAVA

With its irresistibly smooth roundness, CAVA brings calming harmony to your sauna's atmosphere. Flawless soap stone faces on top and at the front absorb, store and release the heat from the 30 kg of vulcanite stones behind them. This double step ensures evenly perfect warmth and moisture. With its traditional materials and feel and advanced heat distribution concept, CAVA is an ongoing invitation to relax and recharge in genuine style.

A climate of calm

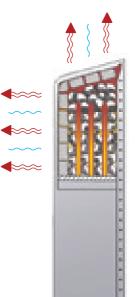

CAVA's "up and out" heat distribution system quickly sets the perfect climate for a genuine sauna experience. Because natural materials make up so much of its surface, CAVA integrates elegantly with its surroundings, letting you take even more pleasure in the calm of the setting.

CAVA's heat generation and distribution sounds simple, but there are true scientific principles at work.

- Dual-stage top and front heat distribution ensures quick yet gentle climate
- + Holds up to 30 kg of high capacity core vulcanite stones for effective heat storage and radiance
- Attractive soap stone surfaces and rounded brushed steel shell set the mood for relaxation at a glance
- Available in 6kw or 9kw versions, letting you take advantage of CAVA whether your sauna is small or medium
- + Easy-to-use control unit can be outfitted with an energy-saving cord and installed inside or outside the sauna

HEAT RADIATION

Heat radiates from the core vulcanite stones inside CAVA, storing in the soap stones above and to the front of them. The soap stones release the heat and soft steam evenly both up and out, giving a perfectly even and pleasant temperature in the sauna.

CONTROL UNIT

Surface or flush-mounted to the sauna wall, the DIGI-1 control touchpad makes everything from regulating temperature to adjusting the lights simple and convenient. Its 24 hour preset timer lets you preheat the sauna to when you are ready for it.

Electric Sauna Heaters

FUSION

Sometimes, you're in the mood for the traditional intensity of dry sauna. Other times, the cleansing touch of soft, billowy steam. FUSION is the heater that lets you have both—and every climate in between. Once you set the temperature and humidity, FUSION automatically takes care of the rest. With FUSION, you get the genuine sauna experience, exactly as you prefer it.

Easy does it

With FUSION, deciding which sauna climate you want is the only hard part. Built-in electronic temperature and humidity sensors automatically correct and adjust to provide steady levels throughout your sauna. You can even choose the option of connecting your FUSION heater to a water line, ensuring the reservoir refills automatically.

- + Heater size 175h x 140w x 30d in chrome steel casing—effective, attractive, discreet
- **+** Easily holds up to 30 kg of quality heating stones
- Can be floor-mounted easily and safely, or you can choose to flush-mount it for added visual appeal
- No-fuss controls let you set automatic temperature, humidity and sauna duration. The easy-to-use control panel remembers your last setting, and lets you pre-programme sauna heating 24 hours ahead
- You can also maximise the convenience factor with a remote control for sauna settings, as well as extract fans and lighting
- Automatic sauna drying function at the end of every session with alert signal

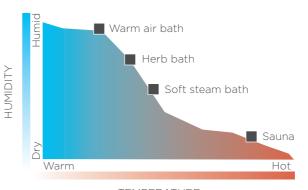

Learn more at our website

FUSION is the only heater that lets you set exact temperature and humidity levels, and maintain them throughout your sauna.

ALL SAUNA COMBINATIONS AVAILABLE

A single heater that offers every combination of the sauna experience, from traditionally dry and hot, to nicely soft and steamy.

TEMPERATURE

CONTROL UNIT

FUSION comes with its own specially adapted, easy-touch control system. Use it to regulate temperature and humidity balance and set the sauna time duration. The smart and convenient touchpad remembers your last setting, letting you enjoy it again with a touch of the button. And the system can be fixed with a remote control for maximum convenience.

Sauna Heaters

HEATERS

Something for everyone

Your choice of Helo sauna heater will depend in part on personal taste, and in part on the functional demands of the sauna cabin. With many cabins you have more than one choice. If you need help finding the best option for your sauna layout and type, please do not hesitate to contact your local Helo dealer.

DESIGN

Despite its name, our DESIGN heater is more than a pretty face. Divided symmetrically front and back panels mean DESIGN looks good freestanding or mounted to the wall. But it also ensures almost twice as many rocks (up to 35 kg) are in direct contact with the heating elements—resulting in a blissful, mellow steam and eventempered heat.

La costruzione delle pareti minimizza la temperatura superficiale riducendo così il rischio di scottature. Involucro in acciaio inossidabile smaltato. Le resistenze sono in una lega al nichel – cromo resistente alle alte temperature e alla corrosion.

APOLLO

Clean styling and quality climate development are the hallmarks of APOLLO. Encased in stainless steel, APOLLO creates and maintains a steady level of comfort thanks to its open top stone exposure and advanced heating technology. Simply classic, irresistibly modern—APOLLO and its 23 kg of stones ensure the ideal conditions for personal relaxation and recharging.

APOLLO is available in 4.5kw and 9kw with VDE-tested circuitry for maximum safety. Easy-access basket holds up to 23 kg of sauna stones.

■ LUMI

Lumi has been recently upgraded with an elegant tapered chrome steel design. It holds between 20-23 kg of stones, generating a soft, luxurious sauna climate. Lumi features easy to access manual controls, which can be installed to the left or right, making it convenient to manage the built-in timer and thermostat.

Chrome. 500x435x265 (wxhxd). Check safety distances in the installation manual. Recommended amount of rocks 20-23 kg

PIKKUTONTTU

A result of our collaboration with renown Finnish designer Ristomatti Ratia, PIKKUTONTTU is a harmonious combination of high form and function. Shaped exclusively for corner fittings, PIKKUTONTTU stylised shell is insulated to keep its surface cool, protecting against skin burns. At the same time, its 70kg rock mass assures incomparably luxurious billows of soft heat and steam.

Available in black or red, with four different control options. Size 990x460x460 mm. Because of its low surface shell temperatures, PIKKUTONTTU can be fixed close to sauna benches with minimum clearance—check safety distances in the manual.

■ HELO WOOD BURNING HEATER

HELO wood burning stoves are ideal for purists who want to experience the unique pleasure of sauna bathing outdoors. Even preheating the sauna is something to look forward to—nothing compares to the smell, feel and traditional atmosphere of burning natural wood. Robust steel casing and extra large rock pocket ensure a rich and mellow steam. The ultra-efficient burning system keeps the heater free of soot.

HELO wood burning stoves come in sizes with outputs ranging from 12 – 28kw. Smoke leading pipes and fittings and hot water tank available separately. Installation may require special permission from your local authority.

FINNISH TRADITION

Finns have had an ongoing love affair with saunas for more than 1000 years. Who better then to lead in the innovation and design of modern sauna heaters?

HELO's Finnish roots ensure originality and expertise are at the heart of every sauna heater we produce. Sometimes we collaborate with leading designers. Sometimes innovation is the exclusive result of our ongoing research and development. Either way, our experience and passion is your guarantee that every HELO sauna heater is purpose-built to provide the very best and most genuine sauna experience available.

SKLA LAAVA

Freestanding Helo SKLA Laava heaters have been an industry standard for more than 25 years. Designed for large, commercial sauna rooms, Laava heaters are robust, easy to maintain and their 60 kg of stones create an attractively soothing sauna climate. Laava's separate control unit makes instant regulation of the heater's high capabilities very easy.

Graphite, 725x540x500mm (hxwxd), Recommended amount of rocks 60kg. Check safety distances in the operating manual prior to installation and use.

■ SKLA MAGMA

Helo SKLA Magma is specially engineered for larger commercial saunas that require durable, powerful and cost-efficient heaters—without compromising on the rich steam and soothing sauna atmosphere. Available in a variety of models to suit different business needs, Magma heaters also offer a choice of traditional and digital control systems. All Magma heaters accommodate 120 kg of rocks, ensuring a genuinely ideal sauna climate for guests.

Graphite-coloured, 700x895x520mm. Holds a full 120 kg or stones. Check safety distances in the operating manual

PROFESSIONAL HEATERS

Maagma and Laava heaters are ideal for professional sauna environments thanks to their high rock capacity, generating a luxurious and stable sauna climate in larger spaces. Sturdy, intelligently-engineered construction minimises maintenance and ensures many years of problem-free performance.

Control units

Managing the temperature, timing and comfort features of your sauna should be as relaxing as the bath itself. Depending on the option you choose, HELO sauna control units make it easy to regulate the climate, pre-heat the cabin so it's ready when you are or just soften the lights—all with a few simple taps on the touchpad.

EASY

- Easy to use and install.
- 5-step "+" and "-" temperature adjustment.

SAUNA PERSONALISATION

At Helo, we believe a genuine sauna experience is one that is matched to your personal comfort and style. That's why our long experience in sauna innovation is applied to every detail—from wood finishing to lighting, exclusive fittings, even water buckets. All designed to let you create a personal retreat with the quality levels and preferences that are just right for you.

Helo offers many choices for the customisation of your sauna interior and exterior, many of them presented over the next few pages. If you need any help or advice, your Helo dealer will be happy to make recommendations.

Sauna Personalisation FURNISHING

Whether you've chosen a standard or luxury Helo sauna cabin model, you have many options for making it a personal, always welcoming centre for well-being. Common to all is workmanship of the highest standard, ergonomic intelligence and aesthetics that will make every sauna a joy to experience.

■ Interiors for standard cabins

All Helo cabin interiors are finished using only solid, natural woods, specially selected for their aesthetics and temperature resistance abilities.

Depending on the cabin model you choose, interior furnishings can include any or all of bench aprons, back rests, top quality benches, moveable leg rests, adjustable headrests and water bucket with ladle.

TREAT YOURSELF

As you've made the decision to enjoy all the benefits of the genuine sauna experience, why not upgrade the interior with your own extra comfort touches? Quality-conceived with attention to both aesthetics and ergonomics, luxury interior furnishings and fixtures make your personal rejuvenation centre all the more inviting. Luxury interior packages include any or all of the options below:

EXCLUSIVE LUXURY INTERIOR OPTIONS

- Design bench aprons in a range of comforting patterns let you create an exclusive look
- Matching design backrests handcrafted from carefully selected abachi wood look beautiful and feel comfortable on skin
- Reinforced benches with extra wide rounded edge slats enhance a feeling of solid quality
- + Free-standing leg supports and large headrests, handmade and ergonomically sound, add to your interior's inviting comfort and enhance the pleasure of your sauna experience
- Oversized heater guard rail protects adults and children alike against accidental skin burns

■ Luxury interior: Dream

Comfort is key to Dream's warm and inviting personality. Finished in a rich mix of dark meranti and light abachi, the contrasting texture and colours create an atmosphere of stylish calm.

For maximum comfort and well-being, Dream includes extra wide back rests and head rests and ergonomic knee-supporting leg rests. The tactfully discreet corner lighting column splashes a soft, mood-making wash of light.

■ Luxury interior: Relax

Relax is a special interior for those who treasure purity and elegance above all. The interior layout minimises clutter and keeps sight and movement lines clean and clear, enhancing the luxurious warmth and simplicity of the room.

As a special feature, Relax bench back rests are designed for extra comfort with additional width.

The interior combines dark meranti and light abachi to great effect, and also features a discreet corner lighting column.

Luxury interior: Swing

Swing is one of our best selling luxury sauna interiors, and with good reason: every detail is designed to maximise ergonomic benefits. Every softly rounded furnishing piece in Swing—from bench faces to back, head and leg rests—is thoughtfully health and comfort-optimised to ensure your physical and spiritual well-being with every bath.

An integrated corner lighting column adds to the exclusive look and charm.

Sauna Personalisation WOOD TYPES

SCANDINAVIAN QUALITY

There's a good reason we only use only wood in our saunas. Specifically, high quality Scandinavian or northern climate wood. Trees from the far north grow much slower because of the extreme climate, increasing their density. This makes them much better at withstanding the wide daily temperature and humidity fluctuations of your sauna. Our ancestors knew this, which is why they chose solid northern wood as the only construction material in their saunas—inside and out.

All our wood is quality inspected at its source before transportation to Germany, where the logs are cut and planed. Each individual tree has its own character in colour and structure. These are distinctive signs of a natural product, showing its exclusive, individual character, with no impact on final quality.

HOW HELO USES WOOD

- Sauna cabin structure and exteriors are made of low-resin varieties such as spruce, pine, hemlock or fir.
- Interior fittings are made of special abachi softwood, which is splinter free, smooth and durable with very low heat retention
- We NEVER use low quality chipboards or plywood. Every part of your Helo sauna is made with solid wood planks

WHY WE USE WOOD EXCLUSIVELY IN OUR SAUNAS

- No material other than wood is used to build your sauna, with the exception of decorative elements on the outside of the cabin
- Wood has low heat conductivity. This means we can touch it even at high temperatures without risk of burning ourselves.
- + Its natural fibre structure allows it to absorb steam and moisture and release it again, making it ideal for saunas
- Wood is stable and durable, muffles sound and radiates a pleasant, natural warmth

Woods used in Helo saunas

NORDIC SPRUCE

Low-resin, slowly-grown northern classic is durable and dense with many small character-enhancing knots

HEMLOCK

A very strong and dense dark red Canadian wood with a distinctive fine-grained structure. Low resin, knot-free

NORDIC PINE

Durable with a smooth, nearly knot-free character that creates an even, warm-looking surface

RED CEDAR

Has very little resin, yet still has that characteristic cedar smell. Cedar colours can range from red to dark brown.

ASPEN

From the poplar family, aspen is a clear, light wood that is preferably used for interior fittings

FIR

White-yellow softwood with fine grain. There are no resin channels in the wood. Fir is very resistant to humidity.

ABACHI SOFTWOOD

Soft wood, knot- and splinter-free. One of the few woods we use that is not native to northern climates. creates an even, warm-looking surface

Quick set-up, durable 12.5 mm Nordic spruce panelling

58 mm fir walls and ceiling reflect heat without added insulation and minimised use of materials

Aspen has a unique heat conductivity resistance—it stays comfortable to the touch regardless of temperature.

Trim in abachi softwood, as well as benches, headrests, backrests, duckboard, bench aprons, heater guard rail and light unit

Sauna Personalisation SAUNA DOORS AND WINDOWS

Sauna doors and windows may seem like an afterthought. But at Helo, we know every element makes its own unique contribution to the genuine sauna experience. We set very high standards for our doors and windows-after all, they play an integral role in keeping the climate in your sauna stable by sealing in heat. And doors, whether in wood or glass, must continue to be an open invitation to relaxation and recharging even after many years of daily use.

Helo sauna cabins often come with many door and window options that let you customise your home getaway to your exact needs. If you need help or advice choosing,

- Door framing timbers have glued tenon joints, ensuring high stability and resistance to warping
- Door edges and frame are triple rebated for a precise, tight fit where applicable (not all glass doors require this feature). This helps to keep hot air inside the sauna.

Attractive wall-high all-glass

All glass doors, clear or bronzed, are crafted in 8 mm safety glass to resist impacts and maintain a heavy, high quality look and feel

Doors with single pane fulllength face, optional tinting

Sauna Personalisation COLOUR-LIGHT THERAPY

The effect of both colour and light on our mood and health is well-documented. What better place to combine their beneficial properties than in your Helo sauna, where relaxation therapy has already been raised to an art form?

Vitalix is an LED colour-light system that can be set to any soothing colour preference, or to merge into a variety of colour combinations. It's a natural choice for enhancing the relaxing and refreshing effects of your sauna.

- LED lighting system is longer lasting than other lighting technologies and uses less electricity, offering trouble-free colour-light therapy cost-effectively
- Vitalix can be custom-fit into your sauna at the planning stages, or just as easily installed into your existing sauna.

Choose from a wide range of cally chosen to induce a proven

PROFESSIONAL SAUNAS

Happy guests come back. It's the golden rule of the leisure and hospitality trades, and a key to success for professional sports venues. Helo has decades of experience in supplying the genuine sauna and team experience to professional industries. We can help you create an inviting, relaxing environment that adds real value and generates positive word of mouth and returns for your facility.

With Helo, you can be involved as little or as much as you want in the design of your wellness area. Either way, we offer full support from concept development to planning, construction and opening. Best of all, our proprietary design and development tools and experienced teams mean your facility's wellness area will be ready within 4 to 6 weeks of our very first coonsultation.

At your service every step of the way

Whether you need updates to an existing wellness area, equipment replacements, or a full new concept-to-creation service, Helo will be happy to help. Whatever your requirements, we work closely with you to ensure your solution matches your needs exactly and with a minimum of fuss.

Our experienced specialists provide advice, plan every detail and oversee your project until its finish at the agreed-upon time. We understand your need for a minimum of interruption to your day-to-day business, and will build your business' wellness area during a mutually-agreed quieter time—ensuring it is ready for your busier periods without disruption. Within 4 to 6 weeks of our first consultation, your wellness area will be ready to treat guests to the genuine sauna and steam experience. In many cases, your modern, top quality addition can be achieved for the price of a middle class car!

- Reliable: Helo Sauna has more than 30 years of experience and tradition as a leading supplier of guest wellness solutions to the hospitality industry
- One contact: Helo manufactures every detail of your solution. One point of contact means peace of mind for planning, installation and after sales service.
- Auality workmanship: Helo professionals are highly experienced in the planning and installation of wellness areas for businesses. Sauna and steam rooms, heaters and decorative and comfort elements are all produced from the very finest, quality-sourced materials.
- **Cost-effective:** Your investment in a Helo wellness area pays itself back many times over because of its contribution to customer satisfaction—and the further business it creates.
- **Fast:** From our first consultation to the grand opening of your custom wellness centre takes no more than 4-6 weeks.

SECURE PLANNING, PRECISE PROGRESS

Developing your wellness centre starts with an initial consultation to determine any particular themes you might have in mind, take measurements and advise on technical details. We can also work from your architect's drawings if the wellness centre is planned for a new facility.

We will generate our own professional, fully-detailed drawings for you to approve and correct if necessary before installation begins. Throughout the project, you will have ongoing access to our professional team.

When only the best will do

TOP QUALITY WOOD CONSTRUCTION AND FINISHING

Helo only uses solid wood components in the cabin and finish of your wellness centre. Only solid wood ensures a genuine sauna and steam experience, and can withstand the rapid fluctuations in temperatre and moisture. But you do have many choices in the types of wood used for inner and outer construction of your wellness centre—a description of the wood options you have can be found on page 51.

PROFESSIONAL HEATERS

Helo heaters are renown for their innovative design and problem-free performance. Depending on the size and layout of your wellness centre, you will have many options for customising the climate-generation of your solution—your Helo advisor will be happy to help.

include personalised decor touches to support the theme or brand value of your organisation. Anything is possible-just ask your Helo advisor.

RECOMMENDED PROFESSIONAL SAUNA HEATERS

Maagma and Laava heaters are ideal for professional sauna environments thanks to their high rock capacity, generating a luxurious and stable sauna climate in larger spaces. Sturdy, intelligently-engineered construction minimises maintenance and ensures many years of problemfree performance.

COMFORT AND DECOR CUSTOMISATION

The interior and exterior of your wellness centre can be tailored to suit your exact your ambition and budget.

Hotel Neuwarft, Germany

The general wellness trend is becoming more and more important to small and medium sized hotels. The 130 bed Hotel Neuwarft on Germany's North Sea coast is no exception.

Working closely with the owners, Helo experts developed and implemented a comprehensive wellness centre—including everything from adventure showers and infrared cabins to saunas and steam baths. Each was designed individually and integrated into the onsite centre by Helo.

For this hotel, it was important to ensure short distances between the different spa areas. Overall planning also recognised the need to make best use of available space and minimise maintenance costs to the hotel.

Kaya Kalp, India

Directly opposite the Taj Mahal, the 5 star Kaya Kalp has been erected featuring an exclusive spa and wellness area. In consultation with the architects and hotel directors, Helo provided budget and equipment proposals for the project. With the support of partners in the Indian market, Helo designed several sauna rooms, steam baths, infrared cabins and an exclusive Hamam.

The resulting "Royal Spa", spread over 99.000 sqm, is modelled on the luxurious lifestyle of the Moghul dynasty and is truly one of a kind in India. In 2008, the Royal Spa was awarded the prestigious "Spa of the Year" title...

PRODUCTION SCHEDULE

comfort and design needs. Seating benches, back and head rests and bench aprons are available in a wide range of quality solutions, as are all interior and exterior fittings and windows. Your Helo advisor can help you make the choices to match both

Week 2 to 5: Build

Week 6: Inspect, test and open

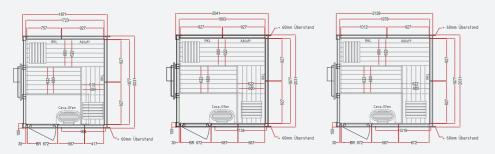

Technical Specifications SAUNA INTERIORS

Whatever sauna cabin you choose, it will include some interior layout decisions. For some cabins, you will have the option to size in increments as small as 8.5 cm. Others will feature many options in fixed increments. The charts included here give you an idea of what's possible for your cabin choice. If you don't find the interior layout you hoped for, please do not hesitate to contact your Helo dealer.

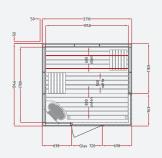

CUBE

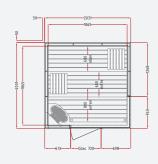

CUBE comes in three convenient sizes, making this unique and eye-catching sauna work with the dimensions available to you. In any size, there's comfort and closeness for two with a refreshing corner of clear space to enhance the overall feeling of roominess.

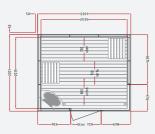

COMFORT

COMFORT offers three layout options, making it easier to find one that works best for you and your home. Each is easy and convenient to install, letting you enjoy the genuine sauna experience as quickly as possible.

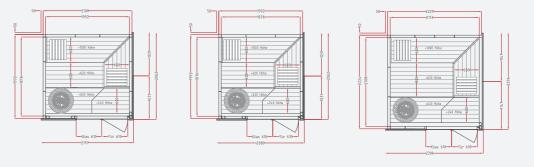

CUPREME

With CUPREME, you choose the sizing and proportions of your personal sauna in 11cm increments. We custom-produce your sauna according to your exact specifications. We can also help you measure your space onsite and make appropriate recommendations.

CASA

CASA comes in 16 popular layout options. Shown here: Compact square, a staggered dual-level configuration for up to four people. Ask your local Helo dealer or turn to the Technical Specifictions pages for more options.

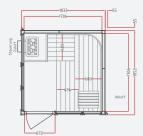

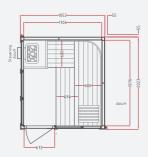

SPRING

Compact yet intelligently laid out, SPRING saunas in any of their three layout options could be ideal for a fitness room. Ask your local Helo dealer or turn to the Technical Specifictions pages for more options.

VARIO CONCEPT

Customised VARIO saunas are easy to integrate in any area of the home. Thanks to sizing increments as precise as 8.5 cm, your personal wellness centre can make a style and relaxation statement out of almost any unused space, giving you many more interior planning options.

| FUSION | 60 DE | 80 DE | 90 DE | |
|----------------------|---------------------|-------------|-------------|--|
| Heating power (kW) | 6.0 | 8.0 | 9.0 | |
| Sauna size (m³) | 5 - 9 | 8 - 12 | 9 - 13 | |
| Stone (kg) | 23 | 23 | 23 | |
| Measurements (mm) | 415x580x415 | 415x580x415 | 415x580x415 | |
| Control unit options | 1 | 1 | 1 | |
| Floor integrated | No | No | No | |
| Extra features | Water tank 4 litres | | | |

Fusion sauna heater offers the luxury of both dry and hot or soft and steamy sauna climates, according to your mood.

DESIGN

| DESIGN | 45 ST | 60 ST | 80 ST | 90 ST |
|----------------------|---------------------|--------------------|-------------|-------------|
| Heating power (kW) | 4.5 | 6.0 | 8.0 | 9.0 |
| Sauna size (m³) | 3 - 6 | 5-9 | 8-12 | 9-13 |
| Stone (kg) | 25 | 35 | 35 | 35 |
| Measurements (mm) | 475x560x300 | 475x560x300 | 475x560x300 | 475x560x300 |
| Control unit options | 1 | 1 | 1 | 1 |
| Floor integrated | No | No | No | No |
| Extra features | Available with buil | t-in control units | | |

Triple-wall construction minimises surface temperatures to prevent burns. Corrosion-resistant stainless steel shell and enamel finish. Heating elements are made of heat- and corrosion-resistant chrome-nickel alloy.

APOLLO

| APOLLO | 30 DE | 45 DE | 60 DE | 80 DE | 90 DE |
|----------------------|-------------|-------------|-------------|-------------|-------------|
| Heating power (kW) | 3.0 | 4.5 | 6.0 | 8.0 | 9.0 |
| Sauna size (m³) | 2 - 4 | 3 - 6 | 5 - 9 | 8 - 12 | 9 - 13 |
| Stone (kg) | 15 | 15 | 23 | 23 | 23 |
| Measurements (mm) | 420x590x300 | 420x590x300 | 420x590x300 | 420x590x300 | 420x590x300 |
| Control unit options | 2 | 2 | 2 | 2 | 2 |
| Floor integrated | No | No | No | No | No |
| Extra features | - | | | | |

APOLLO is available in 4.5kw and 9kw with VDE-tested circuitry for maximum safety. Easy-access basket holds up to 23 kg of sauna stones.

PIKKUTONTTU

| PIKKUTONTTU | 45 DE | 66 DE | 90 DE |
|----------------------|-------------|-------------|-------------|
| Heating power (kW) | 4.5 | 6.6 | 9.0 |
| Sauna size (m³) | 3 - 8 | 6 - 12 | 9 - 16 |
| Stone (kg) | 90 | 90 | 90 |
| Measurements (mm) | 460x990x460 | 460x990x460 | 460x990x460 |
| Control unit options | 2 | 2 | 2 |
| Floor integrated | Yes | Yes | Yes |
| Extra features | - | | |

Available in black or red, with four different control options. Size 990x460x460 mm. Because of its low surface shell temperatures, PIKKUTONTTU can be fixed close to sauna benches with minimum clearance—check safety distances in the manual.

HELO WOODBURNING HEATER

| HELO W.B HEATER | HELO 12 | HELO 12 L | HELO 16 S | HELO 20 L |
|----------------------|-------------|-------------|-------------|-------------|
| Heating power (kW) | 12.0 | 12.0 | 16.0 | 20.0 |
| Sauna size (m³) | 5 - 13 | 5 - 13 | 6-16 | 8-22 |
| Stone (kg) | 30 | 30 | 35 | 40 |
| Measurements (mm) | 400x680X430 | 400x680X430 | 410X730X495 | 410X730X520 |
| Control unit options | - | - | - | - |
| Floor integrated | No | No | No | No |
| Extra features | - | | | |

HELO 12 is perfectly sized for cabins 5 to 13 m2. Smoke leading pipes and fittings and hot water tank available separately. Installation may require special permission from your local authority.

LAAVA

| LAAVA | 901 | 1051 | 1201 | 1501 |
|----------------------|-------------|-------------|-------------|-------------|
| Heating power (kW) | 9.0 | 10.5 | 12.0 | 15.0 |
| Sauna size (m³) | 8 - 13 | 9 - 15 | 10 - 18 | 14 - 24 |
| Stone (kg) | 60 | 60 | 60 | 60 |
| Measurements (mm) | 475×700×515 | 475x700x515 | 475×700×515 | 475x700x515 |
| Control unit options | 1 | 1 | 1 | 1 |
| Floor integrated | No | No | No | No |
| Extra features | - | | | |

Recommended amount of rocks 60kg. Check safety distances in the operating manual prior to installation and use.

MAGMA

| MAGMA | 181 | 210 | 260 |
|----------------------|-------------|-------------|-------------|
| Heating power (kW) | 9.0 | 10.5 | 12.0 |
| Sauna size (m³) | 18 - 30 | 24 - 36 | 30 - 46 |
| Stone (kg) | 120 | 120 | 120 |
| Measurements (mm) | 880x700x510 | 880x700x510 | 880x700x510 |
| Control unit options | 1 | 1 | 1 |
| Floor integrated | No | No | No |
| Extra features | - | | |
